Count 1 is directed to a Markush claim consisting of final products. It is therefore patentably distinct from count 3 which is directed to intermediate compounds used in preparing the final products.

Count 2, which is drawn to a species, is

patentably distinct from count 1 because although

embraced by the broad genus of count 1, applicants

have provided data which demonstrates unexpected

results, and hence, unobviousness over the broad genus

of count 1. See the Declar

FROM : Johann Richter, SPE 1201

SUBJECT: Initial Interference Memo re Appl.

Count 1 is directed to a Markush claim consisting of final products. It is therefore patentably distinct from count 3 which is directed to intermediate compounds used in preparing the final products.

count 2, which is drawn to a species, is patentably distinct from count 1 because although embraced by the broad genus of count 1, applicants have provided data which demonstrates unexpected results, and hence, unobviousness over the broad genus of count 1. See the Declaration by Dr. Lavelle filed 4-27-95.

TELEPHONE NO 308-4572 1211 In sum, RPR claim 142 and BMS claim 7 define the same compound and thus define the same invention. The PTO has already issued BMS patent claim 7; RPR claim 142 must, therefore, be allowable. Species Count 2 links RPR claim 142 and BMS claim 7 by "OR" as follows:

# Proposed species count and claims designated as corresponding thereto

#### Count 2

 $4\alpha-10B$ -diacetoxy- $2\alpha$ -benzoyloxy-5B,20-epoxy-1B-hydroxy-7B,8B-methylene-9-oxo-19-nor-11-taxen- $13\alpha$ -yl(2R,3S)-3-tert-butoxycarbonylamino-2-hydroxy-3-phenylpropionate

OR

N-debenzoyl-N-t-butoxycarbonyl-7-deoxy-8-desmethyl-7,8-cyclopropataxol.

RPR claim 142 and BMS claims 7, 8 (to extent it depends on claim 7), and 9 (to the extent it depends from claim 7) should be designated in Form PTO-850 as corresponding to species Count 2.

### 3. RPR claim 141 is patentable and interfering with BMS claim 10

Claim 141 of the present application and claims 10 and 11 of the BMS patent define the same patentable invention directed to intermediate compounds. Claim 141 was rewritten from cancelled claim 101, and, as Exhibit E shows, claims the same subject matter as the cancelled claim. The RPR specification, moreover, fully supports claim 141, as shown in Table 4:

Specifically, RPR claim 141 falls completely within the scope of Claim 10 of the BMS patent and defines the same invention. Because BMS patent claim 10 has issued, narrower RPR claim 141 must be allowable. Intermediate Count 3 links RPR claim 141 with BMS claim 10 as follows:

### Proposed intermediate count and claims designated as corresponding thereto

#### Count 3

A taxoid of the formula:

OR

A compound of the formula:

in which R<sup>13</sup> is hydrogen, acetyloxy or hydroxy; R<sup>14</sup> is hydrogen; or R<sup>13</sup> and R<sup>14</sup> jointly form a carbonyl group.

RPR claim 141 and claims 10 and 11 from the BMS patent should be designated in Form PTO-850 as corresponding to intermediate Count 3.
